

## CHARACTERISTICS OF SINGLE PARENT GROUPS

Single parent groups are largely the history of Parents of Teens in that moms gathered together in the first years. This is still true in many cases when fathers do not have the time to leave work and come to a class held during the day.

AGENDAS for Single Parents are designed with the presumption that moms are usually in attendance rather than moms *and* dads, therefore, there is no COUPLE HUDDLE during the class. SMALL GROUPS are naturally all women.

Now and then there are exceptions and a few dads are sprinkled in with moms and those are exceptional times when dads make the time during the day to attend Parents of Teens.
